

## ABOUT THE PROJECT

The Entre4all project aims to produce training materials and a tool kit for people with disabilities to enable them to acquire entrepreneurial and digital skills, and set up their own social enterprise.

## WHO IS IT FOR?

- Direct target group: young adults with disabilities
- Indirect target group: adult educator/trainers, social workers, cares, experts, ...

## THE CONSORTIUM

## OUTPUTS AVAILABLE ON WEBSITE

The project outputs are finished and available on our project website. These are the survey results about social entrepreneurship as infographics, national and transnational reports available in English and the national languages. The competence framework identifying the competences that people with disabilities will learn in the Entre4all training course and the mapping tool showing social entrepreneurship initiatives in all of the partner countries are online.

## TRAINING MATERIALS & PLATFORM

The training materials for our course to empower people with disabilities to become social entrepreneurs are developed. They are being translated into national languages right now. The course covers the topics of entrepreneurial skills, digital skills, financial skills and social skills. Additionally, we have developed optional modules with case studies of social entrepreneurs in different fields. An open badge system for the evaluation of learning efforts will be available on our platform.

Follow us on social media to be the first to know when our platform goes online!

## CAMPAIGN, TRAINING & COMMUNITY CENTRES

In December our campaign to promote social entrepreneurship for people with disabilities started. Follow our social media channel to see the campaign video clips and interesting sneak peaks of our training topics.

In 2021, the Entre4all project partnership will start with the development of the Entre4all community centres. These centres will be opened in each of the partner countries and will operate as hubs for people with disabilities interested in social entrepreneurship. Additionally, our Train the Trainer week will take place, during which trainers will get a first introduction to and have hands-on experience of our finished training materials.
