

**The Official Newsletter of the Quality for Digital Education  
Readiness in VET Project - Q4EDU**  
Project number: 2020-1-PL01-KA226-VET-095343

The Erasmus KA2+ Q4EDU project aims to **support VET institutions**, which were badly impacted by the Covid-19 pandemic, **in their digitalization process**. It will **focus on online tools, evaluation and examination methods, and a framework to assess digital readiness at VET level**.

### What we have done so far

Partners have started the project's activities by detailed research and analysis of the already established Quality Assurance Models, which were then compared in order to find the most adequate ones for this project. The consortium has decided on the three most adequate models which are:

- The DigCompOrg framework
- TQM tools
- EFQM model

Our first products related to Methodological Framework (IO1), are already available on the project's website:

- IO1/ A1: Selection of Methodologies
- IO1/A2: Digital Readiness Evaluation Methodological Framework

Find them here: <https://q4edu.eu/en/results/>

## What we are doing now

---

Partners are now working on defining the profile of the Q4EDU expert and deciding the modules that will be offered to the VET teachers that would like to follow the training course. During this training course, the teachers will be able to familiarize themselves with quality assessments, indicators, and criteria, and will have the opportunity to evaluate the digital readiness of their VET institution.

The modules that will be provided are the following:

- Leadership & Governance Practices
- Teaching and Learning Practices
- Professional Development
- Assessment practices
- Content and Curricula
- Collaboration and Networking
- Infrastructure

## What we will do in the future

---

Partners are now discussing the assessment procedure and the possibility of providing certificates to interested VET trainers after the completion of the training course. They will then develop the content of the training course, after a detailed and shared methodology developed by everyone.

## Second Transnational Project Meeting (TPM2)

---

The second Transnational Project Meeting took place in Thessaloniki, Greece on the 7<sup>th</sup> and 8<sup>th</sup> of April 2022 and it was hosted by Atlantis. The meeting was hybrid since some partners traveled to Thessaloniki whereas some others participated online. During the meeting, partners discussed in detail the current and upcoming activities related to the training course, as well as the assessment procedure, presented future tasks and mentioned all the updates in regards to the project's dissemination and quality.
