

The CARE2LEARN Newsletter

TARGET GROUPS

- PS & ECEC Teachers
- Preschool children
- Parents

CARE2LEARN OBJECTIVES:

1. **Increase** key early **competencies** and the likelihood of academic success and positive life outcomes for children.
2. **Increase** the **capacity of parents** of preschool children to **provide support** to children for the development of early key skills.
3. To **relieve ECEC and PS** (primary school) **teachers** from the pressure through greater involvement of parents in their children's education.

TRANSNATIONAL PROJECT MEETING 2

The consortium of the CARE2LEARN project attended their second Transnational Project Meeting (TPM2) via a hybrid meeting to examine the project's progress. Currently, the consortium has managed to complete Project Result 1 (PR1) and Project Result 2 (PR2), which included the development and digitalization of the "**School Readiness Assessment Tool**".

In addition, the partners discussed the Quality Assurance, Evaluation and Dissemination of the project.

WHAT'S FOLLOWING NOW?

The following steps of the project include the development of an early intervention tool, in the form of a **mobile application**, in order to tackle potential learning disadvantages of pre-school children. The purpose of the mobile application is to strengthen the early key competences of children and help parents increase their knowledge on topics such as **socioemotional skills, psychomotor skills, motivation and learning and language and literacy skills**.
