

Youth driven digital transformation of green employments for a sustainable future.

Project Progress

Since our 2nd Newsletter, the GreenWave project has reached an important milestone which is the completion of the core content development of the PR2's **Multimedia Pack** and the development of the AR Game

The topics developed in the Multimedia Pack are:

- Creation of Green Business Plan & Implementation of Circular Economy.
- Staff Recruitement and Green Jobs & Eco Mindset in the Business.
- Short and Long Tem Impact on the PlanetMeasuring the Footprint & Promoting Nature
- Legal Establishment of a Business & Taking an Active Business Stand for the Environment.
- System Thinking and Solving Problems via Business and Process Approach & Sustainability and Unsustainability.
- Critical Thinking Skills - Strategies for Development and Information Management & The future of Green Opportunities-Market Exploration Strategies.

In parallel, the PR3 Open interactive portal, e-learning and recruitment tool for green-preneurs is being developed.

The 3rd TPM in Greece

The 3rd TPM for the Erasmus+ GREENWAVE project was hosted by the partners of IDEC, between the 2nd – 3rd of February 2023.

During the meeting, the finalization of PR1 was discussed as well as the educational material developed as part of PR2. Another part of PR2 that was discussed during this fruitful meeting, was the AR Learning Game for green entrepreneurship which incorporates scenarios and case studies about issues to be addressed.

Next Steps

The following steps of the GREENWAVE Project are focusing on the 4th Project Result, which is the development of the **Green Entrepreneurship youth hubs Tool Kit**.

The partners will do a multi-media campaign that will first, raise the awareness of the public (especially YP, YWs, volunteers etc.) and second, to launch the **GreenWave Recruitment Scheme**.

The GreenWave Recruitment Scheme will offer opportunities for upskilling, job shadowing, internships and volunteering.

Through this project result, the EU GREEN DEAL is promoted further, as pro-active and up-skilling opportunities are provided to reach the green transition and achieve a more circular economy.
